Art Unit: 3753

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-92, 98, and 99, drawn to method for controlling a fluid , classified in class 137, subclass 828.
 - II. Claims 93-97, 100, and 101, drawn to a method for forming a hydrophobic or hydrophilic surface including the steps of etching and spin coating photoresist, classified in class 156, subclass 1+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of the claims of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the claims of Group I are drawn to a method of controlling a fluid using a heater and the claims of Group II are drawn to a method of forming a surface.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to on to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
